PROFILE

Results-driven Fullstack Developer with strong expertise in building web and cross-platform mobile applications using ReactJS, VueJS, Express.js, Laravel, and Flutter. Adept at delivering maintainable, high-performing applications, from requirement analysis and REST API development to responsive user interfaces and deployment. Experienced in API integration, reactive state management, code refactoring, and Agile development environments. Proven ability to turn real business needs into practical software solutions. Committed to continuous learning and excellence in the fast-evolving world of software development.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Des 2025 – Present

- Built a web-based Point Of Sale (POS) system for a mobile and accessories store in BEC Bandung as a fullstack developer, handling requirement analysis, system design, backend and frontend development, and deployment.
- Delivered smaller client projects like fixed a bug in the product return workflow of a motorcycle workshop POS application, and conducted requirement analysis, designed, and built a web prototype of a book management system for a mobile library service.

Frontend Developer Intern – PT Kerjaku Inti Sejahtera

Jun 2024 – Oct 2024

- Developed a cross platform Point Of Sale (POS) system (Web & Mobile) using flutter and GetX state management, establishing a modular architecture to ensure UI consistency and high code reusability across platforms.
- Integrated 90 RESTful API endpoints to power core retail workflows, including realtime inventory management, multi role access, cashier transaction processing, and sales reporting.
- Collaborated in an Agile development team with backend developer, ui/ux designer, and project manager to resolve frontend integration bugs and optimize screen responsiveness across devices, and streamline feature release cycles.
- Technologies :** Flutter

AWARDS & ACHIEVEMENTS

Finalist, 37th National Student Scientific Week (PIMNAS) 2024

- Selected as one of 84 finalist teams in the Community Service category, competing at the national level from more than 5,000 funded projects.
- Represented our project at PIMNAS, one of Indonesia’s leading student scientific competitions, with evaluation based on innovation, technical implementation, and community impact.
- Issued by :** National Achievement Center (Puspresnas), Ministry of Education, Culture, Research, and Technology.

Funded, Student Creativity Program (PKM) Grant 2024

- Selected as one of 51 proposals in the Community Service (PM) category to receive national funding, competing against submissions from 401 vocational institutions.
- Secured funding to develop SIMPEMAS, a mobile application designed to address a real-world community need.
- Issued by :** Directorate General of Higher Education (Belmawa), Ministry of Education, Culture, Research, and Technology.

PROJECT EXPERIENCE

Mobile & Accessories Retail Management System – ReactJS, ExpressJS

Aug 2026 – Present

- Transformed a 14 sheet Excel bookkeeping workflow into a fullstack retail POS for a mobile store in BEC Bandung.

Internal Quality Audit Information System (SAMINA) – VueJS, Laravel

Dec 2024 – Jul 2025

- Developed role-based modules for SPM, auditors, auditees, and departments using Vue 3, Vuetify 3, Pinia, Vue Router, and Vite with an MVVM architecture.

- Automated audit lifecycle communication by building an automated email notification system (SMTP), keeping the stakeholders synchronized on schedule deadlines.
- Implemented end-to-end audit lifecycle features, covering desk evaluation, document uploads, PTK monitoring, and automated reporting.

SIMPEMAS Mobile App – Flutter, Firebase

Jan 2024 – Sep 2024

- Developed a student facing mobile interfaces for a nationally funded app, contributing to a workflow transformation that reduced proposal processing times from 2 weeks to 3-5 days.
- Engineered end to end proposal submission & progress tracking flows, implementing template downloads and Firebase Storage integration for PDF Uploads.
- Implemented key features for stakeholder scheduling and community feedback, leading to the project receiving national PKM funding and advance to the PIMNAS 2024 Finals.

EDUCATION

Politeknik Negeri Bandung – Bandung, Indonesia

2022 – 2025

Associate Degree in Informatics Engineering - GPA: 3.21

- Relevant Courses: Data Structures & Algorithms, Software Design, Mobile App Development, Object-Oriented Programming, Project Management

CERTIFICATIONS

- | | |
|--|------|
| • Junior Software Tester – ArutalaLab | 2025 |
| • TOEIC Score: 745 | 2025 |
| • Employability Skills – Wadhwani Foundation | 2024 |
| • Intro to Programming with C – Dicoding | 2023 |

TECHNICAL SKILLS

- **Languages:** Dart, JavaScript, TypeScript, PHP, SQL
- **Frameworks:** Flutter, Laravel, VueJS, CodeIgniter, ReactJS, ExpressJS
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase Realtime Database
- **Tools:** Git, Postman, Pinia, GetX, DBeaver
- **Dev Methodologies:** Agile/Scrum
